

SecureMailScope — Cryptographic Security Posture

Passive PCAP analysis. Sessions are sorted worst-risk first. Generated: 2026-09-04 16:23:08 UTC

Session	Protocol	Source	Destination	Severity	Risk	ML anomaly	Findings
pcap-stream-0	SMTP	192.0.2.10:40001	198.51.100.20:25	CRITICAL	50	0.0030	• CRYPTO-001 [CRITICAL] SMTP session on port 25 carried no TLS encryption at any point (credentials and message content sent in cleartext). • ML-RISK-001 [INFO] Supervised ML risk classification: CRITICAL.
pcap-stream-1	SMTP	192.0.2.11:40002	198.51.100.21:587	CRITICAL	20	0.0030	• CRYPTO-001 [CRITICAL] SMTP session on port 587 carried no TLS encryption at any point (credentials and message content sent in cleartext). • CRYPTO-007 [HIGH] Server advertised STARTTLS support but the client session proceeded in plaintext anyway. • ML-RISK-001 [INFO] Supervised ML risk classification: CRITICAL.
pcap-stream-2	IMAP	192.0.2.12:40003	198.51.100.22:143	CRITICAL	20	0.0012	• CRYPTO-001 [CRITICAL] IMAP session on port 143 carried no TLS encryption at any point (credentials and message content sent in cleartext). • CRYPTO-007 [HIGH] Server advertised STARTTLS support but the client session proceeded in plaintext anyway. • ML-RISK-001 [INFO] Supervised ML risk classification: CRITICAL.
pcap-stream-3	POP3	192.0.2.13:40004	198.51.100.23:110	CRITICAL	20	0.0028	• CRYPTO-001 [CRITICAL] POP3 session on port 110 carried no TLS encryption at any point (credentials and message content sent in cleartext). • CRYPTO-007 [HIGH] Server advertised STARTTLS support but the client session proceeded in plaintext anyway.
